

## Bringing Clarity to Compliance Management

Since 2002, GreenSoft Technology, Inc. has been a leading provider of environmental compliance content management tools and services for the global electronics industry. GreenSoft provides content management services and software management tools to assist companies comply with environmental compliance requirements and directives (such as EU RoHS, REACH, REACH SVHC, China RoHS, PFOS, PAHS, DECA-BDE, and Halogen-Free) or product declaration content forms from OEMs.

GreenSoft's mission is to streamline the internal management processes of the Green Supply Chain by providing the best Green data services and Green product management software for the global electronics industry to address growing environmental compliance requirements worldwide.

### Data Management Services

GreenSoft provides quality Data Management Services to OEMs, CMs and EMS worldwide. Customers for GreenSoft's Data Management Services include market leading companies such as Flextronics/Solectron, Haier, Honeywell, APC, NET, Bio-Rad, Agilent, and Beckman Coulter. Services include BOM scrubbing, data collection, data validation, and format conversion.

GreenSoft has relationships with over 5000 suppliers worldwide and has a broad range of expertise in active and passive components, electrical and mechanical parts, packing and printing materials, and raw materials including gas and chemicals. GreenSoft's parts database of over 24 million parts includes lifecycle, compliance, and material composition data. GreenSoft also collects data for lead-free manufacturing and tin whisker mitigation.

### Software Solutions

GreenSoft has developed a number of software products to help engineers manage compliance data. GreenData Manager-REACH manages a company's green data collection, performs validation analysis, conducts substance analysis, and generates product-level full disclosure reports. GreenData Manager-REACH is a comprehensive solution for RoHS and REACH SVHC compliance and is available in both single desktop and client-server versions.

### ISO 9001:2000 Certification

GreenSoft is registered to the GB/T19001:2000 idt ISO 9001:2000 Quality Management System standard, demonstrating a dedication to and implementation of a systematic and quantifiable approach to quality-of-service standards through a rigorous auditing process.

### Location

GreenSoft is headquartered in South Pasadena, California, near the center of the Los Angeles metropolitan area. GreenSoft's R&D center and content factory are in Hebei, China. We also maintain a liaison office in Taiwan.
